Ashlar-Vellum™ Releases Graphite™ v10

February 2, 2016, Austin, TX. Ashlar-Vellum announces the release of Graphite v10, the latest release of their intuitive 2D/3D CAD wireframe drafting package for both Mac and Windows.

This new version will feature support for the latest operating systems including Mac OS X 10.10 (Yosemite), 10.11 (El Capitan), and Windows 8.1 and 10. Other important enhancements have been added to the software's 2D PDF import and export. Additionally, a font report has been added to specify missing fonts and offer substitute font designations. The Draw Control order in v10 can now be controlled either from the Layers dialog box of the Arrange menu. Tool palettes and dialog box positions are now remembered independently for every screen size used, including single and dual screen configurations. DXF/DWG import supports up to AutoCAD 2016 and the handling of raster images has been improved.

Commented Robert Bou, president of Ashlar-Vellum, "This is a robust collection of user-requested enhancements that overall improves productivity and compatibility both modern operating systems and exchanging data with other users."

Upgrade pricing is available to Graphite v10 from previous versions of v9, v8 and v7. For a complete list of prices, enhancements and their descriptions, visit: <http://www.ashlar.com/get10/>.

About Ashlar-Vellum

Founded in 1988, Ashlar-Vellum is the leading provider of precision CAD and 3D modeling software that automates and simplifies the design process for drafting, design, and engineering professionals on both Macintosh and Windows platforms. Ashlar-Vellum's unique Organic Workflow™ featuring their renowned Vellum® user interface and powerful toolsets have earned the loyalty of innovators around the world. Ashlar-Vellum operates from its headquarters in Austin, Texas. To learn more call +1 800-877-2745 or visit www.ashlar.com.
